

We understand that the MSME's today face a major cash crunch due to late payments and cannot entirely focus on bettering their business. This is where we at Lend Partner come to the rescue! We understand how important it is to keep a business afloat, so with the help of our latest technology in AI and ML we bridge the gap between the MSME and their monetary requirements by making use of "Invoice Discounting". In Invoice Discounting we make use of the Invoices as a security to provide the much needed financial help. The Invoice is discounted at a certain price and is made available online for Investors to invest and voila you receive the money within 3 days! After you receive your due payment, you back the amount and we distribute it back to the Investors, providing a win – win situation for both the parties!

We believe that the SME's today can grow at an exponential rate with the help of the latest technology and resources available today, but they face various roadblocks due to the issue of delayed payment. We at Lend Partnerz are here to remove that roadblock and provide the SME's a smooth journey to their prosperity by employing the Invoices in possession of the company to raise the required working capital and in that process making sure that the Investors who provide the money benefit from it!
